Emergency Communications

Depending on the situation, the college may use different methods to communicate important information and updates with employees and students.

Emergency Alerts

The Lee College Emergency Alerts are designed to enhance and improve communication to the campus community in the event of an emergency or campus closure (e.g., ongoing safety threats, severe weather events, etc.). The goal is to use several methods to deliver messages to the community as a whole and spread the word, not to individually reach each member.

This service is free for students and employees, but you must sign up to receive the notifications. [Sign up today!](#)
