Subject: FW: emegency division meeting

Hi Joe,

I need Curriculum Maintenance Request #1836 CAAC approved asap for inclusion in the catalog. As it stands the AAS MT2 degree is out of compliance at 61 semester credit hours. It was out of compliance at 59, a solution was approved to change ITSY 1342 to ITSY 1442, which should have corrected the issue. However, another submission was approved to change ITDF 1300 to 1400 which bumped the degree up to 61. This solution is to replace ITDF 1400 with INTW 1309. An emergency division meeting was held and voted on – supporting documentation was added to Maintenance Request # 1836.

Please advise. I need to finalize the catalog.

Thank you,

Jodi Rodriguez

Subject: emegency division meeting

I need an emergency email division meeting. Our degree plan is out of compliance. I need to change IDTF 1400 and replace it with [ITNW 1309 - Fundamentals of Cloud Computing](#) Credits: 3 to get us back to 60 credit hours.

Does everyone agree?

Do you have any issues with this?

Please respond with your name and vote.

"The years of anxious searching in the dark, with their intense longing, their alternations of [confidence](#) and exhaustion, and final emergence into light—only those who have experienced it can understand that."
